

Meet Shrimal

Software Development Engineer in Test

Chennai • shrimalmeet2001@gmail.com • 8955251538 • Portfolio • LinkedIn • GitHub

PROFESSIONAL SUMMARY

SDET with **3+ years** of experience building scalable automation frameworks using **Playwright**, **Selenium**, and **Python**. Delivered measurable impact by reducing regression effort by **60%** through automation of **250+** test cases across critical e-commerce modules. Skilled in **API automation**, **SQL**-based data validation, and **CI/CD** integration (**Jenkins**, **GitLab**). Leverages AI tools (Claude) to generate test scenarios, uncover edge cases, and enhance overall test efficiency. Seeking SDET roles focused on automation-first, high-quality software delivery.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Automation Tools: Selenium, Playwright, pytest, Page Object Model (POM)

API Testing: Postman, Swagger UI

Tools: Jenkins, GitHub Actions, Git, Jira, POM, Requests (Python), Claude (Anthropic), GitHub Copilot

Testing Types: Functional, Regression, Cross-Browser, API, UI, UAT

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

KEURO HEALTH & TECHNOLOGY LLP (FORMERLY FLOODID.IN)

Chennai, Tamil Nadu

Software Development Engineer in Test

September 2024 - Present

- Built automation frameworks using **Playwright** and **Selenium with Python** to automate 10+ critical modules including cart, checkout, and user profiles, covering 250+ test cases and reducing regression effort by 60%.
- Integrated automation test suites into **CI/CD pipelines** using **Jenkins** and **GitLab**, supporting 3–4 deployments per week with continuous testing and faster feedback.
- Built and executed **API automation** test suites using **Postman** and **Python** (requests) with **pytest**, validating response contracts, status codes, and ensuring data integrity across 10+ application flows.
- Performed backend data validation using **SQL** queries to ensure data integrity across APIs and database layers.
- Identified, reported, and tracked defects using **Jira**, logging **100+** defects and coordinating with developers to ensure timely resolution and retest sign-off.
- Leveraged AI tools Claude (AI-assisted coding) to generate test scenarios, identify edge cases, and improve test coverage efficiency.
- Owned and documented the automation stack — **Playwright**, **Selenium**, **pytest**, **Jenkins**, **GitLab**, **Postman** — building reusable, scalable test infrastructure that improved release confidence and reduced manual testing effort.

FLOODID.IN

Remote

QA Engineer

July 2023 - August 2024

- Developed automation scripts using **Selenium with Python** for 5+ core modules such as homepage, PDP, and product flows.
- Configured and maintained **Jenkins pipelines** for scheduled automation execution during deployments, reducing manual effort by 30%.
- Designed and maintained a CRM **API automation framework** using **Python**, **Pytest**, and **Requests** library following **OOP-based** design patterns, integrated with **GitHub Actions** CI/CD pipeline.
- Analyzed requirements and designed **test scenarios** for functional and regression coverage, improving test effectiveness.
- Logged and tracked 100+ defects in **Jira**, performing retesting to confirm resolution.

EDUCATION

GEETANJALI INSTITUTE OF TECHNICAL STUDIES, RTU

Udaipur, Rajasthan

Bachelor of Engineering in Computer Science – 87%

2019-2023
